Studio - Getting Started

In the Studio you create your works – from the first idea to the finished chapter. Here's how to get started.

Creating a New Work

1. Open the **Studio** section.
2. Click on **New Work** and enter a title.
3. Choose the type of work: **Story** (plain text), **Manga** (panels with speech bubbles), or **Picture Story** (image and narrative text per page).

Writing Chapters and Content

- Create new chapters in the **Chapters** tab and write your text.
- Using the AI buttons, you can generate an **outline** or text suggestions and then edit them freely.

Generating Images

- In the image section, you describe a motif and the AI creates a suitable image in portrait format.
- You can choose a **style** so that all images in a work match each other.

Publishing

When your work is finished, you publish it in the **Library**. From there it is visible to others and can – if you wish – be sold in the **Shop**.

Tip: AI functions consume credits. You can view your current credit balance at any time under **Account & Subscription**.
